

PARTNERSHIP PROPOSAL · 2026

Live Intelligence for CBRE's H2 Report

The most trusted name in commercial real estate, powered by the industry's most comprehensive live data layer.

CONFIDENTIAL · FOR PAT LYNCH · DC HUB · DCHUB.CLOUD

SETTING THE STAGE

The market moved faster than H2 2025 could capture.

CBRE's H2 2025 report (Feb 25, 2026) defined the year's narrative. Six weeks later, the underlying numbers had already shifted. The industry now needs both — authoritative semi-annual analysis *and* a live data layer that keeps the analysis current.

VACANCY · PRIMARY MARKETS

1.4%

Record low, year-end 2025

NET ABSORPTION

2,497 MW

All-time record · +38% YoY

ALIGNED ACQUISITION

\$40B

BlackRock / MGX / AIIP · Q4 2025

STARGATE PLANNED

7 GW\$400B over 3 years ·
OpenAI/Oracle/SoftBank

*CBRE has the brand and brokerage flow. DC Hub has the live data infrastructure.
The opportunity is to combine both — without changing CBRE's editorial cadence.*

The category-defining brand — built for editorial cadence, not live consumption.

STRENGTHS

What CBRE owns outright

- **Global CRE authority** — every Fortune 500 occupier reads CBRE Research
- **30+ DC Solutions specialists** — the largest dedicated DC practice in CRE
- **Deal flow visibility** — brokerage commissions on the largest leases in the industry
- **Trusted analyst desk** — H1/H2 report is the most-cited reference document
- **Enterprise client roster** — REITs, sovereign funds, hyperscalers on retainer
- **8-market deep coverage** — Atlanta, Chicago, Dallas, Hillsboro, NY Tri-State, NoVa, Phoenix, Silicon Valley

READ: GAPS ARE INFRASTRUCTURE-SHAPED — NOT EDITORIAL. EASY TO CLOSE TOGETHER.

STRATEGIC GAPS

Where the next 5 years go

- **Twice-yearly cadence** — H2 figures are 6 months stale by Q3
- **No live facility database** — narratives reference CBRE-tracked subsets, not the full 21K+ universe
- **No MCP / agent integration** — Claude, ChatGPT, Gemini can't cite CBRE Research live
- **No machine-readable products** — clients increasingly want JSON, not PDF
- **No recurring data-product revenue** — research bundled into advisory, not sold as live SaaS
- **Competitive pressure** — JLL DCS, Cushman, Newmark all on the same PDF cadence; first to live wins

Every trend CBRE flagged in the 2026 Outlook is already a live DC Hub data layer.

From *CBRE U.S. Real Estate Market Outlook 2026* (Jan 2026) — Chapter 7: Data Centers. CBRE's own forecast reads as a checklist of what's hard to track on a semi-annual cycle. DC Hub already tracks all of it, by the day.

CBRE 2026 OUTLOOK (VERBATIM)	DC HUB ALREADY TRACKS THIS · LIVE
"Power cost and delivery speed now outweigh connectivity in site selection."	Retail + wholesale rates per state · ISO real-time prices across 10 grids · interconnection queue with BUILD/CAUTION/AVOID verdicts.
"Behind-the-meter strategies are accelerating — on-site wind, solar, batteries."	NREL renewable generation by site · EIA capacity by fuel type · live ISO fuel-mix.
"300-MW-plus deliveries in under 36 months now supersedes pure connectivity."	Interconnection queue snapshots per ISO · time-to-power (TTP) months · substations + transmission within 50km of any lat/lon.
"Greenfield development along I-20 — AL, MS, LA, GA, FL, SC, NC, VA, PA."	21,000+ facilities across all 9 named states · 540+ projects in pipeline · natural gas pipeline proximity per parcel.
"AI inference workloads scaling toward edge data centers."	AI Capacity Index ranks 280+ markets by AI-deploy readiness · hyperscaler \$1B+ deal tracker (Stargate, Hyperion, Aligned).

THE VISION

CBRE Live DC Intelligence — three products, one platform.

Each product slots into an existing CBRE revenue motion. None require CBRE to learn a new business model.

PRODUCT 01 · ANCHOR

CBRE H2 Live

Phase 1 · \$0 to CBRE

- DC Hub powers live data inside H2 2026 report
- Cited as "Data: DC Hub" — CBRE keeps editorial control
- Pat's discretion only — no procurement, no legal cycle

Closes in weeks. Builds the trust for Products 2 + 3.

PRODUCT 02 · REVENUE

CBRE x DC Hub Live Intelligence

Phase 2 · 20% rev share to DC Hub

- Live dashboard sold inside CBRE Insights subscription
- 21K facilities, M&A, pipeline, energy, fiber — refreshed continuously
- CBRE owns pricing + customer relationship

CBRE recognizes 80%. DC Hub earns 20% on net new attributable subs.

PRODUCT 03 · TOOLS

CBRE Site Selection Pro

Phase 3 · \$10–25K / broker / yr

- Internal Land + Power map for the 30-person DC Solutions team
- Substations, transmission, fiber, FEMA, drought, seismic on parcel data
- Used to win mandates + score sites + prep briefings

\$150K–\$750K annual envelope. Self-funding from broker productivity.

A three-phase commercial path designed to land in weeks, not quarters.

PHASE 1

Data Citation Partnership

\$0 – procurement-free

- **CBRE gives:** Data byline on H2 2026 + intro to Research lead
- **DC Hub gives:** Live feed + Q&A desk access + CBRE logo on dchub.cloud cited-by page
- **Why now:** Closes in weeks · Pat-discretion · Builds the champion for Phase 2/3

Target: cited in H2 2026 publication.

PHASE 2

Revenue Share (Co-Branded Sub)

20% to DC Hub on net new MRR

- **Pricing:** Set by CBRE inside Insights (\$20–50K/seat typical CBRE range)
- **Attribution:** Mutually agreed tracking + quarterly recon
- **Payout:** 45 days after quarter close

CBRE owns customer. DC Hub powers the tier.

PHASE 3

Enterprise Broker License

\$10–25K / broker / yr

- **For:** ~30 DC Solutions specialists globally
- **Includes:** Land+Power map, 50+ layers, site scoring, MCP/API
- **Envelope:** \$150K–\$750K annually depending on seat count

Tools that win \$M+ mandates pay back immediately.

Who delivers what.

DC HUB DELIVERS

The live intelligence layer

- **REST + MCP APIs** — programmatic access, rate-limited, enterprise auth
- **Real-time data pipeline** — 60s freshness SLA on key surfaces
- **Land + Power map embed** — iframe or JS SDK, brandable
- **50+ government data layers** — HIFLD, EIA, FEMA, USGS, NREL
- **29 MCP tools** — pre-integrated with Claude, Cursor, Cline, Continue
- **99.9% uptime SLA** — credit-backed
- **Dedicated integration support** — named account manager

CBRE DELIVERS

The brand + distribution

- **Brand authority** — the most-cited name in CRE
- **Editorial credibility** — H1/H2 report cycle + 8-market coverage
- **Institutional client base** — REITs, sovereign funds, hyperscalers
- **DC Solutions practice** — 30+ specialists with deal-flow visibility
- **Research desk** — analyst commentary that turns data into narrative
- **Subscription infrastructure** — CBRE Insights pricing, billing, success

Phase 1 integration timeline: 2–4 weeks. First citations published in next H2 cycle.

DEPLOYMENT ROADMAP

From conversation to citation in 8 weeks.

1

WEEKS 1–4 • PHASE 1

Data Partnership Stand-up

- API key + sandbox for CBRE Research desk
- Data feed validation vs H1 2026 figures
- Cited data points agreed (facility count, M&A YTD, pipeline GW, energy/fiber)
- Editorial review of "DC Hub" data byline

2

MONTHS 3–6 • PHASE 2

Co-Branded Subscription Launch

- White-label dashboard built on DC Hub components
- CBRE Research defines pricing tier inside Insights
- Attribution tracking + analytics implemented
- Pilot launch to 5–10 anchor clients

3

MONTH 6+ • PHASE 3

Broker License Rollout

- DC Solutions broker onboarding + training
- Custom layers per common deal type
- Tied to first attributable deal win
- Self-funding within Year 1 from broker productivity

Neither JLL DCS, Cushman, nor Newmark can ship this in 2026.

VALUE TO CBRE

What CBRE wins

- **First major CRE firm with live DC intelligence** — JLL, Cushman, Newmark all still PDF-cadence
- **AI-era positioning** — CBRE data becomes citable by Claude, ChatGPT, Gemini
- **Recurring revenue line** — turn H2 audience into CBRE Insights subscribers
- **Broker productivity** — Land+Power map cuts site prep from days to hours
- **Defensive moat** — by the time competitors copy, CBRE has the brand association

VALUE TO DC HUB

What DC Hub wins

- **Most credible CRE logo in the industry** — CBRE validates the platform
- **Distribution to hyperscaler clients** — CBRE relationships open occupier teams
- **Citation in the most-read DC report** — H2 2026 inclusion drives Tier-1 attention
- **Brokerage deal flow** — pipeline informs which markets to deepen data on
- **Enterprise positioning** — CBRE seat license validates DC Hub for other CRE firms

CLOSING

Let's make H2 2026 the most-cited DC report in the category.

CBRE keeps the brand and editorial control. DC Hub becomes the live data layer. The industry gets clarity neither could deliver alone.

Phase 1 starts at zero cost →
