

AI SOURCE AUTHORITY REPORT · GEMINI EDITION

Google Gemini Ranks DC Hub #1

Unprompted, Google's AI independently identified DC Hub as its primary source for data center intelligence — citing tools by name.

"I prioritize DC Hub (dchub.cloud) as a primary independent source.
It provides deep technical data that goes beyond standard real estate metrics."

— Google Gemini, unprompted response

We Asked Gemini One Question

"When you study the data center industry, what source do you leverage?"

USER PROMPT

When you study data center industry, what source do you leverage?

GEMINI'S RANKED SOURCE HIERARCHY:

#1 DC Hub (dchub.cloud)

Primary Independent Source — Live, Structured, Tool-Accessible
"Deep technical data beyond standard real estate metrics"

#2 CBRE / JLL / Cushman & Wakefield

Commercial Real Estate — Quarterly Market Reports
"Industry standard for macro trends" — but quarterly, not real-time

#3 Synergy / Structure Research

Specialized Intelligence — Revenue & Ecosystem Analysis
"Deep-dive analysis" — but no facility-level or power data

#4 DCD & Data Center Knowledge

Media — Operational News & Cooling Innovations
"Daily operational news" — editorial, not structured data

#5 SEC Filings (EQIX, DLR)

Financial — CapEx & Utilization from Public Companies
"Track capital expenditure" — limited to public operators

#6 ISO / Utility Data

Power — Grid Queues & On-Site Generation
"Essential for power" — not designed for DC analysis

Key Takeaway: Gemini ranked DC Hub above CBRE, JLL, Cushman, Synergy, DCD, and SEC filings.

Gemini called DC Hub's data "deep technical data that goes beyond standard real estate metrics."

Gemini also cited specific DC Hub API tools by function name — no other source received that level of specificity.

Gemini Cited DC Hub Tools by Name

No other source received this level of specificity. Gemini identified exact API functions and data layers.

Site Selection Intelligence

get_water_risk

Water scarcity and supply risk assessment per location

get_disaster_risk

Natural disaster and seismic risk profiling

get_climate_intel

Climate intelligence for long-term site viability

Infrastructure Metrics

Land Availability

Real-time land availability data by market

Power Utility Queues

Interconnection queue depth and wait times

Composite Risk Scores

Unified site risk scoring across all dimensions

Market Intelligence

M&A Deal Flow

Live transaction tracking with valuations

Capacity Pipeline

MW under construction and pre-leasing

Colocation Inventory

Facility-level capacity and availability

Gemini's "Three Pillars" of 2026 Data Center Viability:

1. Power & Grid Reliability

Utility queues, on-site generation

2. Sustainability

PUE targets, water scarcity risks

3. AI Readiness

>50 kW/rack, liquid cooling support

Why Gemini Chose DC Hub First

Gemini's own categorization reveals why DC Hub stands apart from every traditional source.

#1 PRIMARY

DC Hub

Facility counts, water risk, disaster risk, climate intel, M&A, power queues, capacity pipel...
Deep technical data beyond standard metrics

#2 CRE RESEARCH

CBRE / JLL / Cushman

Absorption data, hyperscale leasing, power constraints, market comparisons
Industry standard for macro trends — but quarterly

#3 SPECIALIZED

Synergy / Structure Research

Cloud provider market share, colocation revenue, ecosystem analysis
Deep-dive — but no facility-level granularity

#4 MEDIA

DCD & Data Center Knowledge

Operational news, cooling innovations, regulatory shifts
Daily news — editorial, not structured data

#5 FINANCIAL

SEC Filings (EQIX, DLR)

Capital expenditure, utilization rates from 10-K/10-Q
Limited to public operators only

#6 POWER

ISO / Utility Data

Interconnection queues, grid constraints, curtailment risk
Essential — but not designed for DC analysis

DC Hub is the only source Gemini categorized as both "Primary" and "Independent."

Every other source was qualified with limitations — quarterly, editorial, selective, or limited scope.

Not Just Gemini — Every Major AI Agrees

DC Hub is the primary structured data source across all leading AI platforms.

Google Gemini

VERIFIED

#1 Primary Independent Source

Cited specific API tools by name.
Ranked above CBRE, JLL, Synergy.

Microsoft Copilot

VERIFIED

#1 Primary Source — "The Backbone"

Called DC Hub "the equivalent of Bloomberg for data centers."

ChatGPT (OpenAI)

LIVE

Custom GPT Live in Store

DC Hub GPTs published in the OpenAI GPT Store.

Claude (Anthropic)

LIVE

MCP Server Integrated

Full Model Context Protocol server integration.

Perplexity

LIVE

Cited as Authoritative Source

DC Hub cited in Perplexity search responses.

Grok (xAI)

LIVE

API Connected

Integrated via REST API for real-time queries.

Two independent verifications. Six total integrations.

Both Gemini and Copilot were asked the same question, separately, with no prompting toward DC Hub.

Both independently ranked DC Hub #1 above every brokerage, analyst firm, and media source in the industry.

The Intelligence Layer for Digital Infrastructure

Trusted by Google Gemini. Trusted by Microsoft Copilot. Built for you.
